Summary

Junior developer with a commitment to learning that is matched with the dedication to succeed. Logical thinker that prospers when working in a team but also has the ability to thrive on their own. Being entrusted to lead in the workplace has given me the skills necessary to be able to communicate, give and take directions, as well as meet time deadlines for important tasks.

Technical Skills

Languages: HTML, CSS, SASS, JavaScript, jQuery, Angular.JS, Bootstrap, Node.JS, React.JS, JSON

Database Development: SQL, MySQL

Techniques and Tools: Agile, Test Driven Development, GitHub, Visual Studio Code, Sublime Text

Technical Projects

Aurora Grove - [View on Github](#)

- Created a mock camping site which users can book a trip for them and their children.
- Technologies used: HTML, CSS, Bootstrap

Turret Shooter - [View on Github](#)

- Developed a game where enemies are randomly generated and gravitate towards the turret, when they collide with the turret the player loses health.
- Technologies used: HTML, CSS, JavaScript

ComfyHouse - [View on Github](#)

- My first E-Commerce project which gives the customer a cart to store their items and extra buttons to manipulate the information within the cart as well.
- Technologies used: HTML, CSS, JavaScript

Friendly Chat - [View through Firebase](#)

- An online forum which requires users to authenticate their Google profile in order to chat back and forth with others through text and images.
- Friendly Chat has Analytics, Google Authentication, Hosting, Storage, Cloud Database, and performance monitoring
- Technologies used for this particular project include HTML, CSS, JavaScript, jQuery, Angular.JS, JSON, Firebase, and command line functions.

Education

Untapped Code Academy

November 2019

- Full time 14-week immersive Full-Stack Coding Bootcamp

Central Dauphin East High School

2016
